PROGRAMMING EXPERIENCE

Creative and driven junior software developer, eager to hone technical skills, especially in back-end programming. Some technical highlights of my experience so far include:

- **HTML and CSS:** Adept at creating clean HTML files with creative and modern CSS design. I have used both languages to create fresh style and presentation in each of my various projects that stood out and intuitively grabbed the attention of the user. In a project, I created a website for a movie theater that utilized Bootstrap Carousels, Cards, and Forms.
- **JavaScript:** Enhanced HTML tags and made websites more interactive and dynamic using JavaScript methods and functions in projects such as a portfolio website in which I made functions for a slideshow.
- **Python:** Using Python, Tkinter, and Sqlite I created a phonebook GUI that allows the user to save a contact's information in a database, as well as the option to update and delete previously stored entries. I also used Python IDLE, PyCharm, and the Django Framework on a team project to create a complex MVC application.
- **C#:** Using Entity Framework Code First, I assisted in a team project in which we created an MVC 5 application that consisted of web pages using C#, MS MVC, .NET Framework, and MS SQL. This project was done using Agile/Scrum methodologies and clean source control.

WORK HISTORY

Keiding Inc. - Front-End Developer

Milwaukee, WI • 01/2022 - Current

Using HTML, JavaScript, the Svelte framework, and Tailwind CSS, I assisted in creating a responsive, touchscreen interface used by Shipping (forklift mounted) to track skid counts and locations.

- Developed designs to meet specific requirements such as quick-loading sites with particular layouts.

EDUCATION

The Tech Academy

Portland, OR • 01/2022

Certificate: Software Development

Description: At The Tech Academy, I was trained in an immersive Software Development boot camp that covered the fundamentals of Computer Science, HTML, CSS, JavaScript, Python, C#, and SQL. Filled with over 800 hours of practical experience working on several coding challenges and projects both individually and in a team environment. Here I also learned version control and various project management methodologies.

Keiding Inc. - Front End Developer

Milwaukee, WI • 09/2021 - 10/2021

Using HTML, CSS, and JavaScript, I assisted in creating a functional, intuitive, and aesthetically pleasing touchscreen interface used by line workers to display information about parts being manufactured on a production line.

- Worked in Agile-driven environment to effectively maintain project timelines and utilize available resources.
